Amendment No. 2 to Registration Statement on Form S-1

Overview, page 1

1. We note your revisions in response to prior comment one and reissue in part. Your statements that "ATH-1017 significantly improved P300 latency" and "P300 latency is a functional measure that is highly correlated with cognition" appear to imply an expectation that the improvement in P300 latency will result in cognitive improvement.

Please revise these statements and similar statements on pages 5, 90 and 108 to clarify that you have yet to establish a connection between the P300 latency results observed in your Phase 1 trials and improved cognition.

You may contact Michael Fay at 202-551-3812 or Daniel Gordon at 202-551-3486 if you

have questions regarding comments on the financial statements and related matters. Please $% \left(1\right) =\left(1\right) +\left(1\right) +$
